Stuller.com

When Stuller was founded in 1970, Matt Stuller set out to satisfy the customer. Today, 40 years later, that same vision holds true.

Stuller has been beside you over the years, growing product lines tailored to your needs and creating more ways to help you succeed. We have an extensive inventory that includes mountings, findings, diamonds, gemstones, bridal jewelry, tools, jewelry, packaging and displays. You are sure to find everything you need, every time.

Often, you need more than stylish products. So, we design sales aids for just this purpose. Use stuller.com to get real-time product information available 24/7. Enhancing your tried and true selling techniques with digital solutions is the new world of doing business.

Your success is our ultimate goal.

METAL TYPES

Dura Tungsten™

- Wolframite and scheelite team up to form tungsten.
- Scratch resistant.
- Steel gray to light gray in color.
- 27% lighter than most tungsten bands.
- 50% more durable than all other tungsten carbide rings.

White Dura Tungsten™

- Looks like white gold, feels heavier than platinum.
- Most scratch resistant metal yet.
- 27% lighter than other tungsten carbide rings.
- 50% more durable than all other tungsten carbide rings.

Dura Cobalt™

- Looks like white gold.
- Crack proof and durable.
- Removable by electric ring cutter.
- Stretchable by ¼ size.

Stainless Steel

- The steel alloy carries at least 11% chromium.
- Shiny gray in color.
- Lightweight and hypoallergenic.

Titanium

- The 'Space Age' metal is derived from mineral deposits rutile and ilmenite.
- Immerse plating (IP) produces colors from medium blue to bronze.
- Corrosion resistant with a lustrous finish.

Ceramic

- An inorganic, non-metallic substance.
- Available in a variety of colors from black to pink.
- Scratch resistant, lightweight, hypo-allergenic, heat resistant and fade resistant.

Ceramic Couture® Jewelry

This is a permanently polished, hi-tech aerospace material, hi-tech ceramic, and Stuller's unique formula of Ceramic Couture.

Customers can now discover the amazing look and comfort of Stuller Ceramic Couture rings. In a similar process as Dura Tungsten™, Ceramic Couture hi-tech ceramics are made by powder metallurgy. The process is sintering as in Dura Tungsten. Material used to create Ceramic Couture is the natural element of zirconia crystal mixed with the bonding agent yttria. There are three sources of the natural zirconia powder: China, Korea and Japan. Consistency of the end product depends on many elements of the process, but must start with the finest zirconia. The blanks, finished through sintering to create the scratchproof nature, are then polished on a diamond wheel using diamond compound paste, which results in a polish and shine that will last forever. The Ceramic Couture band is virtually scratchproof since only a diamond can scratch or polish the product. Similarly, a watch will always appear brand new with simple cleaning.

Care of Ceramic Couture Jewelry

Ceramic Couture jewelry and watches should be cleaned with hot water and soap or alcohol to remove dirt embedded in diamond bezels or between watch links. A steam cleaner may be used.

- Do not use ultrasonic cleaning on ceramic.
- Do not use any cleaning chemicals on ceramic other than alcohol.
- Do not use an ionic cleaner.
- Do not intentionally drop on a hard surface with force, or bring hammer force to Ceramic Couture, as the potential of cracking exists.

On gold and silver inlaid Ceramic Couture, you may notice varying degrees of scratching, denting or marring to the surface of the soft precious metals after consumer wear. Simply polishing the entire ring on a regular polishing wheel will return shine to the precious metals without affecting the ceramic surface.

About Dura Cobalt™

Our Dura Cobalt is made of an exclusive composition which provides for stretching the band ¼ to ½ size. It is a beautiful white material that can be cast, or machined. Although a cobalt band scratches, it can be polished as described below with accessible and common wheels and compounds.

Care and Polishing of Dura Cobalt

Use a felt wheel or Stuller 17-1207 with Stuller Gray Star compound 47-3295 or 47-3297. This will remove the scratches and bring finish to a pre-polish. Clean band thoroughly to remove all pre-polish residue. For final polish, use a soft string buff, Stuller 17-1108, with Picasso Blue rouge, Stuller 47-3246. This will bring the surface to a high mirror luster. After final finish is achieved, clean band thoroughly to remove all polishing residue.

The process listed above is done using a flex-shaft machine, mounted felt wheel, and a mounted string buff.

About Vapor Deposition (PVD)

Physical Vapor Deposition, or PVD, is a term used to describe a family of coating processes. The most common of these PVD coating processes are evaporation and sputtering (using magnetic enhanced sources or "magnetrons", cylindrical or hollow cathode sources). All of these processes occur in a vacuum at working pressure (typically 10-2 to 10-4 mbar) and generally involve bombardment of the substrate to be coated with energetic, positively charged ions during the coating process to promote high density. The result is a very strong bond between the coating and the jewelry. It is used commonly to enhance to life of the material itself, such as drill bits and tools. For jewelry, this protects the stainless steel, titanium, or tungsten material it is applied to in our jewelry.

About White Dura Tungsten™

Our White Dura Tungsten has the brilliance of white gold and the strength of our Dura Tungsten rings.

Our patent applied process of a white coating to our patent pending Dura Tungsten is scratch resistant, colorfast, avoids fading, and does not flake.

The utilized process bonds one of the platinum group materials for the white color with hard chromium for the strength and others to cause the lasting bond of a product. Hard Chrome is nearly as hard as the Dura Tungsten and thereby provides the perfect match. Other softer applications on a hard material may cause a different result. Our resultant product nearly duplicates the process used on the chrome bumpers in the automotive industry. The purpose is to provide scratch resistance against the normal wear of the elements, or scratching.

About Dura Tungsten® Jewelry

A metal that is permanently polished and always looks brand new.

Customers can now discover the amazing look and durability of Stuller Dura Tungsten bands. In an extraordinary process, Dura Tungsten bands are made by powder metallurgy, formulated for Stuller using a patent-pending exclusive formula creating the most durable tungsten ring to date. Dura Tungsten composition differs from others by the addition of the most durable titanium carbide powder to strong tungsten and other powders. The rings are polished on a diamond wheel using diamond compound paste, which results in a polish and shine that will last forever. Dura Tungsten bands are virtually scratchproof because only a diamond can scratch or polish the product.

Care of Dura Tungsten Jewelry

Dura Tungsten jewelry should be cleaned with hot water and soap or alcohol to remove dirt embedded in diamond bezels. A steam cleaner may be used.

- Do not use ultrasonic cleaning on tungsten.
- Do not use any cleaning chemicals on tungsten other than alcohol.
- Do not use an ionic cleaner.
- Do not intentionally drop on a hard surface with force, or bring hammer force to Dura Tungsten, as the potential of cracking exists.

EDUCATIONAL INFORMATION

On gold and silver inlaid Dura Tungsten, you may notice varying degrees of scratching, denting, or marring to the surface of the soft precious metals after consumer wear. Simply polishing the piece on a regular polishing wheel will return shine to the precious metals without affecting the tungsten surface. Cleaning by hand with alcohol is recommended.

Facts About Dura Tungsten Jewelry

- Dura Tungsten bands are the most durable rings available.
- Dura Tungsten bands are 10 times harder than 18 karat gold, 5 times harder than tool steel, and 4 times harder than titanium.
- Dura Tungsten measures 7-8 on the Mohs hardness scale (Diamonds are the hardest at 10.).
- Due to their extreme hardness, Dura Tungsten bands will hold their shape and shine longer than others.
- Dura Tungsten bands have been referred to as the “permanently polished rings.”
- The composition of ingredients in Dura Tungsten is available upon request due to the patent pending.
- There are no elements known to create adverse effects on skin in our Dura Tungsten jewelry.

- Tungsten is heat attractive.
- Tungsten is most commonly used in light filaments and the highest quality drill bits.

Removal of any Dura Tungsten, tungsten, tungsten carbide, or ceramic band requires cracking the ring. An exclusive tool is now available — The Stuller Tungsten Ring Cracker.

Until now, materials like tungsten and ceramic have been removed by cracking the bands into pieces with standard vice grip-style locking pliers. This is a standard ring-removal process and often a medical professional is required.

You, the professional jeweler, can now easily take care of customers in your store within seconds and with no pressure to the hand. The Stuller Ring Cracker is sold in a boxed kit. It is supplied with two pairs of safety glasses and an instruction guide. Use of the device is simple: Place the Ring Cracker around the ring and adjust the screw accordingly. The Ring Cracker never touches the finger, nor does any of the application. This is very helpful for swollen or injured fingers. Replacement of the cracked band may be covered under our Lifetime Sizing Policy.

ENGRAVING OPTIONS

- 1) Select the style number you would like to order.
- 2) To order by phone, tell your sales consultant you would like to have the item engraved. For stuller.com orders, click “Customize this Item” to begin the engraving process.
- 3) Select your desired method of engraving from the list of options provided.
- 4) State your message (or type it in the space provided for stuller.com orders) exactly as you would like it to appear.
- 5) Choose your font type and color fill.

Freight and insurance will be billed to you at the time of shipment. To ensure accuracy when placing orders for an item, be prepared to give the following information in this sequence:

- 1) Your Stuller account number;
- 2) The merchandise series number listed in the catalog

Delivery

Most items are in stock for immediate delivery. Engraving orders, add 2 days for delivery, and for Gold inlaid bands, please add 4 days for delivery. Pricing & Delivery for Special orders outside of the catalog specifications can be requested, these items may take up to 5 weeks for delivery.

Pricing

Our Contemporary Metals are priced to achieve maximum profit for you.

MSRP's are listed on all products and per length when applicable. The following margin MSRP's have been suggested in print.

Contemporary Metals – 4 x keystone, or 75% margin
KARAT Gold and Diamond items – 3 x keystone, or 67% margin

General

Please remember these points when showing product from the catalog:

- Most prices listed in the Catalog are suggested retail price at \$1250 gold.
- Prices for Contemporary Metals do not fluctuate with the metal market.
- All prices are approximate and subject to change without notice.

- Rings are available in the finger sizes specified under the item in the catalog.
- Additional finger sizes not listed would be considered special orders for 5-6 week delivery.
- All diamonds in the Contemporary Metals are GIA I2 quality, I-J color.
- Earrings are priced and sold by the pair.
- Jewelry photographed is actual size.
- Items special ordered and shipped, as agreed, or altered cannot be accepted for credit, or exchange. SEE detailed Contemporary Metals Return and Warranty as this product classification has an expanded return, warranty and exchange policy for Contemporary Metals.
- Refused, undeliverable or unclaimed packages will be charged a 10% handling fee, plus postage.

Thank you for adhering to these policies. If you have any questions concerning the general return of merchandise above described, or the Contemporary Metals return, warranty and exchange of items, please contact our Customer Service Department.

Contemporary Metals Return, Warranty, and Exchange Policy

Lifetime Sizing Band Exchange Policy

Where and How to Return

To make a return for credit or exchange, send your contemporary metal jewelry and appropriate invoice number, to Stuller, Inc., ATTN Customer Service, 302 Rue Louis XIV, Lafayette, LA 70508. Please be sure that you securely package and insure your jewelry.

For full credit of your contemporary metals jewelry the item must be returned in original condition, unaltered and include invoice, or number it was invoice to you on. Invoice information must be received with the product.

For any exchanges, the products will be credited to your account based on the invoice price. The price of the new products will be billed at current pricing.

For repair/refurbish items within 90 days, please send the items that have the trademark on them and the invoice number with which they were shipped for repair at no charge.

For repair/refurbish items over 90 days, the applicable service fees above will apply. Engraving options and fee applies.

For Lifetime Band Sizing exchange, please return the ring, or parts that must include a Stuller trademark. The nominal service fee for replacement apply.

Shipping charges apply to all above.

Kit Sales

All selling kit sales are not changeable on initial purchase. They are pre-packaged with displays. You may exchange within 30 days for another catalog item. You will be issued full credit for the returned item with invoice number. The new item billed at listed price.

General

Stuller is not responsible for returns that are damaged in transit. Send the completed Merchandise Return Form or a copy of the original invoice with the returned items. Please include the reason for return. Merchandise returned without this form or a copy of the invoice may be charged a service fee of \$10, or we may return the merchandise to you at your expense. Stuller can provide FedEx PRP labels so you can schedule a FedEx pickup or bring your package to a FedEx drop off location. Your return will be processed with a flat rate charge of \$8.50. PRP labels can only be used for packages weighing less than five pounds and valued at \$1000 or less. If you would like to receive a supply of labels, please request them with your next order.

Items that were special-ordered, altered, cut, or manufactured to your specifications cannot be accepted for credit or exchange. Please keep this in mind when placing your order.

Refused, undeliverable, or unclaimed merchandise not originally purchased from Stuller will be charged for the shipping costs of returning the items. Stuller may not be responsible for returned merchandise if these procedures are not properly followed. Thank you for adhering to these policies. If you have any questions concerning the return of merchandise, or credit for the return of merchandise, please contact our Customer Service Department at 1-800-877-7777, press 3, or send an email to info@stuller.com.
